### Career Objective

A highly committed computer science fresh graduate who is eager to excellently elevate experiences in the progressive tech industry. Driven to produce high quality and outstanding results in every project. Dedicated to advance through exerting my best efforts into practice. Determined to harness my capabilities and utilize weaknesses as my strengths.

### Experience

<b>Backend Developer Intern</b> Toro Cloud	Dec 2024 – Apr 2025
<ul style="list-style-type: none"><li>Explored low-code development and API integration in Martini; developed a POC for demonstrating the use of AI functions.</li><li>Utilized Maven, Java, and Groovy to accomplish other duties and prepared documentations to record progress in project tasks.</li><li>Worked in an Agile development environment and participated in sprints and daily standups.</li><li>Acquired experience in utilizing Git and Bitbucket for version control and managing repositories.</li></ul>	

### Education

<b>Bachelor of Science in Computer Science</b> Holy Angel University	2021 – 2025
<b>Science, Technology, Engineering, and Mathematics</b> Bloomingfields Academy Foundation, Inc.	2019 – 2021

### Awards

<b>Summa Cum Laude</b> Holy Angel University	2025
<b>Consistent President's Lister</b> Holy Angel University	2022 – 2025
<b>General Academic Excellence Awardee (STEM)</b> Bloomingfields Academy Foundation, Inc.	2021

### Organizations

<b>The Access Point</b> Holy Angel University	Feb 2024 – Sept 2024
<b>League of Outstanding Programmers</b> Holy Angel University	Jul 2023 – May 2024

### Seminars and Workshops

<b>3rd Regional Cybersecurity Conference: Cybersecurity in the Age of AI</b> Holy Angel University	Feb 2025
<b>Cyber Resilience in the AI Era: Empowering Business Leaders and Developing Next-gen Cybersecurity Professionals</b> Holy Angel University	Jan 2025
<b>Innovate, Educate, and Elevate with Blockchain: 1st Regional Blockchain Conference</b> Holy Angel University	Jul 2024
<b>Introduction to Artificial Intelligence</b> Department of Information and Communications Technology	May 2023
<b>Autonomous Car Software Design 1</b> Holy Angel University and Halla University	Feb 2023

### Technical Skills

Python

Java

Groovy

MySQL

Git

HTML

CSS

JavaScript

React

Tailwind CSS

### Soft Skills

Strong work ethic

Keen attention to detail

Strategic time management

Clear communication

### Selected Projects

- FIGCHECK**
- Classifies a Filipino sentence as erroneous or error-free through a model trained in Python using LSTM.
- VALUNEST**
- Predicts house prices through linear regression that uses a Kaggle dataset of Filipino house prices.
- QUICKER**
- Provides quick emergency response from nearby areas; developed with Flutter.

### Badges

### Certifications

<b>Project Management 101</b> Simplilearn	Mar 2025
<b>Time Management Fundamentals</b> LinkedIn Learning	Mar 2025
